Company Overview

ANALYZE is an industrial chemical problem solving services, materials R&D and specialty chemical products manufacturing company. The chemists in our problem solving and laboratory services group use their materials expertise to help other companies manufacture their products more successfully. We manufacture specialty chemical products to suit evolving customer needs and perform the R&D required to invent proprietary products. Our company is structured to analyze, invent and commercialize.

3. Numerous Top Vendor Awards from clients

Specific Scientists

1. Steve Valenty PhD.
2. Vivian Valenty PdD.
3. Andy Sodoma PhD.
4. Zhao Chen PhD.

Core Competencies

Products and Services

Patents *Describe:* Numerous Patents on file.

Professional Services ANALYZE provides industrial problem solving services to help manufacturing firms make their products more successfully. Our customers come to us to minimize losses of revenue from long manufacturing processes, product rework issues and dissatisfied customers whose quality standards and delivery dates are not being met. ANALYZE provides laboratory services to characterize organic-based materials including materials identification, organic compound quantification, product deformation and QC.

Research *Which Studies:* We develop and make specialty chemical products to fill a customer's specific need.

Describe: In the past we have made gas selective membrane forming polymers, adhesives, coatings, cleaners, dermal delivery products, lotions, skin care, perfumes, dental products, as well as many other products.

Business Outlook

Mission Statement The company is dedicated to helping their clients be successful and profitably bring needed services/products to the marketplace while providing a working environment where the individual is respected, is able to fulfill his/her potential and shares the rewards of hard work, personal creativity and team effort.

Commercialization Strategy Partner with other companies who have needs that we can fill. In addition to our analytical laboratory services, we are able to formulate new products for our clients as well provide manufacturing for them.

Problems Identification of areas where we can help Arizona based biotechnology companies.

Competition None in Arizona

Synergistic or Strategic Opportunities

Where would the best partners be located?

Arizona is our primary market, although we service the Western United States extensively as well as servicing clients nationally

What kinds of partnerships are of interest?

- I. Consulting, laboratory analyses, R&D and manufacturing services.
- II. Principal or secondary partner on SBIR and other government sponsored research contracts.

When would the company want to partner? Whenever the opportunity arises.

Why would it be good for this company to partner?

We are looking for opportunities to fill the needs of Arizona biotechnology with our expertise in chemical consulting, organic materials characterization and specialty chemical product R&D and manufacturing expertise.

What kind of companies would be good partners?

Well funded small-to-medium sized companies who need organic chemical and material expertise in the development and manufacture of their products.
